Project with
IS's - Intersos

- During the course of the project we realized that in general, the refugees do not fully understand the impact of a good waste management process within the IS's, for most of them the priorities are elsewhere for example in water or sanitation activities.
- However, in the IS's with no major problems, we did realize a good cooperation leading to cleaner common areas with a lower percentage of pollution.
- Concerning composting, we realized that there was no particular interest shown towards the production of compost especially that there was no benefice coming from the use of the final compost product in the nearby areas.
- below are some remarks on the project:
- Awareness materials were needed in order to be distributed to the refugees and use as a reminder
- Always make sure that there is no major problem like lack of water in the IS.
- Some kind of incentive would have helped and motivated the refugees into improving their participation
- The percentage of open air garbage burning significantly decreased after the launch of this project, making the ISs a healthier place for the refugees
- Sewage blockage has decreased over the course of the project.
- More than one session per site is required in order to increase the refugees participation
- Such as reducing or cancelling the fees payed by the settlements to the municipality

ROLE OF MEDIA

BEFORE THE CRISIS

- Not a priority
- Follow politic of the funder
- Didn't contribute in raising awareness among citizens
- Holds part of the responsibility
